Coronavirus Disease 2019 (COVID-19)

The Cal OES State Operations Center (SOC) activated 03/02/20 at 0700 hours in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

Situation Overview

- **California State of Emergency Proclamation**

On 03/04/20, Governor Gavin Newsom declared a State of Emergency for California, as a result of the global COVID-19 outbreak that began in December 2019, to make additional resources available, formalize emergency actions already underway across multiple state agencies and departments, and help the state prepare for broader spread of COVID-19.

- **CDPH Statewide Travel Advisory**

WEATHER KEY POINTS

10/14/21 - 10/20/21

Thursday-Wednesday

- Gusty offshore winds and elevated fire weather conditions will continue across the southern California mountains and canyons into the weekend
 - Gusty winds and elevated to briefly critical fire weather concerns are expected across central CA on Thursday
 - The strongest winds, and critical fire weather conditions, are expected on Friday and Saturday, with gusts across Ventura and Los Angeles Counties reaching 30-45 mph with gusts to around 55 mph.
- Gradual warming trend late this week and into the weekend.
- A pattern change next week will bring more unsettled conditions to the state for the later part of next week.

Longer Term

- Northern California is expected to enter a prolonged wet period with well-above normal precipitation October 21-25th.
 - There are elevated chances for heavy, and possibly record-breaking precipitation amounts for this time of year over portions of central and northern California.
 - While the elevated risk for heavy precipitation may trigger localized flooding over burn scarred areas of the state, the increase in moisture is anticipated to quell ongoing wildfire activity, help improve drought conditions, currently ranging from D1 to D4 across California, and replenish water resources throughout the West Coast.
 - As the event gets closer, the details will become clearer and we will keep you informed.
